PRESS RELEASE
YEAR XXVI - n.16
23rd November 2010

AN APPEAL TO PARENTS WHO HAVE DONATED ON THE XVII ANNIVERSARY OF THE EXPLANT OF OUR SON PAOLO

Stellio

Silvana

Paolo

We feel the need to tell you that we unfortunately gave in to the request for our son Paolo's organs. Paolo was 19 years old. We were crushed by pain and so we signed. We couldn't have made a more wretched decision: we all gave away our children because of disinformation and exhaustion in the face of pressure from transplant industry doctors. We unknowingly had our children butchered and disemboweled, without anesthesia. At least the torturers in the concentration camps didn't ask parents to sign authorization to kill their children.

Our children were seized from intensive care, kept alone, without their parents, and then they were murdered in the operating theatre: *"The surgeon plunges his knife into the neck and cuts down to the breast bone and then down to the navel and then down to groin. The heart is beating. The lungs are breathing. Blood is circulating. The body is warm. It moves, it tries to respond. These are just spinal reactions, according to surgeons, which are suppressed by paralyzing drugs. The inexorable hand of the executioner splits open the breast bone, gets hold of the beating heart and severs it"*. This is how our children died. They were defenseless and alone and weren't able to get a caress and last kiss from their mum and dad. Their bodies had become goods, contended for by those who had been praying to get their organs. Our children have been treated worse than inmates on death row or animals in an abattoir who at least don't have to undergo the prolonged torture.

We all signed because we were made to believe that we were doing "the right thing". The transplant industry mafia defeated us.

Fight so that no other parents have to suffer as we are suffering because we trusted the "transplant coordinators", the surgeons/explanters and all the other collaborators: the coroners/anesthetists/neurologists, nurses, mercenary reporters and more, all of whom participate at the slaughter/explants which they pass off as organ "donation".

This cunning and deceptive way generates social hate, not love.

You parents who have donated, have courage and join us, tell the truth and publically denounce your suffering: do not stifle it in purposely established psychiatric centres.

Let us stop this modern cannibalism which is disguised by science.

The parents of Paolo Mondo
Stellio Mondo and Silvana Mergiani
